

Clothing

In your complimentary New Addition portrait session consultation prior to your portrait session we will discuss clothing choices. We'll work to coordinate clothing with family members to ensure a beautiful portrait of your family and your new addition.

Glasses

Removing glass glare from your portraits adds cost to your portrait order. Please have your lenses removed from your eyeglasses for your portrait session or pick up a matching empty frame from your eyeglass provider.

Hair

If you are going to get your hair cut and styled prior to your portrait session it is often best to have that done one or two weeks prior to the photo session. If photographed immediately after having a new hair cut and style you may not look like you in your portraits.

Mustaches and beards should be neatly trimmed, otherwise a fresh shave looks best.

Make-Up

Keep your make-up natural and bring it along for those necessary touch ups. Powder is essential to keep your skin looking smooth and beautiful so bring some along.

Sunburn

Avoid the sun and tanning booths prior to your portrait session. A little sun looks good, but we can't take the red out of a sunburn.

Sense of Humor

Your portrait session will be comfortable, relaxed, informal and fun. We'll talk, we'll laugh and we'll capture in your portraits who you are. So bring your sense of humor along above all else.

Siblings

Sometimes children get shy or get loud and rambunctious when they are going to be photographed. Feel free to bring water or clear soda and a treat like hard candy or something that isn't messy that the children can have as a

treat for behaving. Let them bring a favorite toy to play with. If your child is comfortable and relaxed, the distractions of a portrait session won't stress them out. And that in turn won't stress you out and your portraits will be beautiful and the experience memorable—in a good way!
